HOW TO STREAM TIPS

1. Livestream Event pages work on most major browsers on Windows and macOS. We recommend using Google Chrome, Mozilla Firefox, or Safari when viewing Livestream from your computer. It's best to update your browser whenever possible.
2. Once you've unlocked your video, you can adjust your **video size** by clicking on the **fullscreen logo** located on the **bottom right of your screen**. To exit full-screen mode, click **ESC** on your keyboard.
3. You can adjust your **video quality/settings** by clicking on the **bottom right HD logo**. Click on **720p HD** for best quality. You may need to wait 1 - 2 minutes for your video to render.
4. You can **pause your video at any time** by using the pause button on the **bottom left** of your video.
